Property Description

Offered at \$695,000, this is the kind of Dominical home that makes sense the moment you arrive. You leave the highway, head up into Vista Dominical Estates, pass through the gate, and within minutes the view opens up. You're not far from town you can still be at the beach, your favorite restaurant, or a pickleball game without planning your whole day around it but you're high enough that the Pacific feels present from the start, not just from one corner of the house. Built in 2022, the home sits on 2.22 acres (8,982 m²) and was designed around one simple idea: keep the ocean in sight. The layout is spread across three levels, with one bedroom on each level, and every bedroom has an ocean view. That matters in real life because everyone gets their own space and their own view, whether it's family visiting or guests who want privacy without being separated from the experience. Inside, it's clean and practical.
