- Development Farm
- Acreage
- Water Front
- Beach Properties

Property Description

Unique Coastal Rainforest Estate Beachfront + Oceanview building sites Brand new to the market and priced to sell, this 21.5-hectare (54-acre) titled estate sits directly on the shore of the world-renowned Golfo Dulce, on one of the last accessible stretches where rainforest meets the sea. An additional 5.7-hectare (14-acre) maritime zone portion brings the total to over 27 hectares (68 acres), including 350 meters of pristine beachfront. The property offers a rare combination of topography: a broad, beautifully groomed flat zone along the shoreline gives way to forested hills rising behind it, creating multiple elevated building sites with sweeping ocean views and cooling breezes. A year-round natural spring runs through the property's center, and the land is bordered by protected forest inside the wildlife corridor linking Piedras Blancas and Corcovado National Parks, ensuring privacy and untouched surroundings for the long term.
