Property Description

The three exceptional farms span across rolling, jungle covered hills that tower above the crashing waves of the Pacific Ocean below – can you imagine a more picturesque location? Each farm is perfect for development, presenting hundreds of acres of flat land – ideal for the construction of a family compound, exclusive estate, an eco-resort, secluded accommodation, horticultural settlement, a yoga retreat ...the possibilities are endless! You can buy one, two, or all three - this is a blank canvas ready to be painted with your dreams! The farms present a 'best of both worlds' location – they are set high up on the ocean side hills, but not high enough to reach the cloud level. This setting guarantees lower humidity, cooler temperatures, and gentle and constant mountain breezes - but without the mist, rain, cold and dampness associated with high altitudes. The views are simply spectacular, covering all areas from Golfo Dulce, Osa Peninsula and, on a clear day, giving a glimpse of the distant Nicoya Peninsula on the other side.
